SUMMARY

Innovative and results-driven Full Stack Web Developer with expertise in Python, HTML, CSS, JavaScript, React.js, Next.js, Nodejs, and databases. Adept at crafting responsive, high-performance web applications, integrating APls, and delivering secure, scalable solutions. Recognized for open-source contributions and strong problem-solving skills. Driven to create impactful digital solutions and elevate user experiences.

EDUCATION

Bachelor of Technology in Computer Science Engineering(AIML) **2024-Present**
Heritage Institute of Technology ***(MAKAUT)*** Kolkata, WB

Senior Secondary Examination **2022-2023**
Oxford House H.S. School ***(WB)***

Secondary Examination **2020-2021**
Oxford House H.S School ***(WB)***

EXPERIENCE

AI/ML Lead — Digital Dominators **July, 2025 – Present**

- Led the AI/ML domain by organizing technical workshops, community events, and innovation-driven initiatives to empower students and tech enthusiasts.
- Strengthened leadership, event management, and community-building skills while fostering a collaborative learning ecosystem.

Campus Ambassador —Open Source Connect Global **Dec, 2025– Present**

- Promoted open-source contribution culture by onboarding and mentoring new developers to participate in collaborative projects.
- Enhanced communication, outreach, and leadership skills while building a strong developer network.

Ambassador — The Girls Who Yap **Feb, 2026 – Present**

- Represented and promoted a Web3-focused fellowship community, encouraging participation and awareness in decentralized technologies.
- Developed networking, advocacy, and community engagement skills while supporting inclusivity in Web3.

PROJECTS

Articuno.AI v1.0 - "Interact. Innovate. Inspire with AI" (Software)
Project: https://github.com/BikramMondal5/Articuno.AI **July 2025**

- Built **Articuno.AI**, a full-stack AI platform integrating **20+ advanced AI models and specialized agents** in a unified interface for tasks like weather forecasting, code generation, video analysis, and web development assistance.
- Implemented **persistent chat history, multi-modal support (text, voice, image, video), and modular AI agents** using technologies such as Flask, MongoDB, LangChain, and APIs from OpenAI, Google Gemini, and xAI.
- Delivered a **modern, user-centric design and seamless real-time interaction** that enhances accessibility to AI tools at no cost, showcasing strong end-to-end development and integration skills.

DevOps-Ghostwriter - "Autonomous DevOps AI Agent" (Software)
Project: https://github.com/BikramMondal5/DevOps-Ghostwriter **Aug 2025**

- Developed **DevOps-Ghostwriter**, an intelligent multi-agent AI DevOps assistant that automates GitHub pull request monitoring, deep security auditing, sandboxed code execution, and documentation generation
- Integrated real-time observability and multi-agent collaboration using Weights & Biases Weave, GitHub webhooks, and advanced AI models to improve DevOps efficiency and enhance code quality workflows.
- Designed and implemented full-stack capabilities leveraging **Next.js, TypeScript, FastAPI, MongoDB**, and AI-powered analysis tools to deliver scalable end-to-end DevOps automation.

MoleculeInsight - "AI Agent Research Platform" (Software)

Project: https://github.com/BikramMondal5/MoleculeInsight **March 2025 – April 2025**

- Developed **MoleculeInsight**, an AI-powered multi-agent research platform that aggregates and analyzes molecular data from clinical trials, patents, market intelligence, and scientific sources to deliver research-grade insights for pharmaceutical and biotech applications.
- Implemented Retrieval-Augmented Generation (RAG), specialized AI agents, and interactive visualization features — including 3D molecule rendering and real-time analysis dashboards — using React/Next.js, FastAPI, and advanced AI model integrations.
- Designed scalable, full-stack architecture with parallel agent orchestration, vector databases, and automated reporting that enhances molecular research workflows and decision-making.

NanoBonds - "AI Agent Research Platform" (Software)

Project: https://github.com/BikramMondal5/Nano-Bond **March 2025 – April 2025**

- Built **NanoBonds**, a decentralized finance (DeFi) platform that **democratizes access to government bonds** by enabling retail users to invest in fractional bond units using stablecoins with global Web3 wallet support.
- Developed and integrated **smart contracts with Solidity/Hardhat, on-chain verification via IPFS, real-time yield tracking, and a responsive UI** using Next.js, TailwindCSS, and MongoDB to deliver a seamless investment experience.
- Designed a **scalable full-stack blockchain architecture** that enhances transparency, financial inclusion, and real-world asset tokenization workflows in DeFi.

InvestorHunt - "Where Ideas Meet Investors" (Software)

Project: https://github.com/BikramMondal5/Investor_-Hunter **July 2025 – Present**

- Developed **Investor-Hunter**, an AI-driven web platform that empowers entrepreneurs to connect directly with real investors through **AI video pitch analysis, multilingual support, and smart investor matching** to streamline startup fundraising
- Implemented key features including **video pitch submissions with instant AI feedback, analytics dashboards, and investor engagement tools** using Next.js, React, TailwindCSS, and generative AI integrations.
- Designed a **inclusive and data-driven full-stack experience** that eliminates traditional barriers like pitch decks and exclusive VC networks, enhancing accessibility in startup investment workflows.

SKILLS

Programming Languages: Python, C, TypeScript
Libraries: Pandas, NumPy, Matplotlib, Scikit-Learn.
Backend: Flask, Node.js, Express.js, MongoDB, Supabase
Frontend: HTML, CSS, JS, Next,js, React,js, Three.js
Tools & Technologies: Git, GitHub, Docker, Postman, VS Code, Anaconda, Linux
Leadership Skills: Team Management, Strategic Planning, Effective Communication, Problem-Solving, Accountability and Responsibility
Languages: Fluent Proficiency in reading and writing English, Bengali and Hindi

ACHIEVEMENTS & CERTIFICATES ↗

- **Winner** of the *Pieces for Developers* project challenge 2025.
- **Finalist** in *East India Blockchain Summit 2.0 at* IIT KGP
- **Finalist** in *Edu-chain Virtual Hackathon*, Semester 2.
- **Finalist** in the **national-level hackathon** *Code for Bharat Season 2* conducted by Microsoft, India
- **Finalist** in the **state-level hackathon** *SBH'25*, ranking among the top 20 teams.
- Oracle Cloud Infrastructure Generative AI Professional Certificate.
- Building Al agents for business analytics with Amazon AWS
- Mastering Retrieval-augmented generation(RAG) with AWS
- Udemy JavaScript Master Course From Beginner to Expert Developer
- Udemy Complete Python Course: Learn From Beginner To Advanced
- Udemy Complete React JS Course 2025 : React JS For Beginners
- Udemy Hands-On R Programming: Build Real World Data Projects.
